Greetings esteemed County Board of Supervisors, staff and community members,

Please accept my sincere condolences for the tragic loss of Supervisor Chan.

Thank you for giving me the opportunity to provide my input as a lifelong resident of South Hayward. Please note these comments are my personal opinion, not an official position from the City of Hayward, in my role as a Council Member.

I've looked at the draft maps A, B, and C. It's confusing as I know where the City of Hayward is geographically but no where on the map does it identify Hayward. I noticed that other cities were listed such as Newark, Fremont, and various unincorporated neighborhoods. This can lead to confusion and lack of understanding. I'm also worried that city officials have not been given the opportunity to take an official city position by way of ranking our preferences after seeking community input from Hayward residents that are accustomed to participating in City Council meetings by calling, attending a meeting in person and/or emailing their public comments.

There is also no corresponding language accompanied with the draft maps that provides context and a better understanding of what the changes represent.

Please consider allowing more time for individual cities to seek input from our collective stakeholders.

Sincerely,

Elisa
Lifelong resident of South Hayward
